

Flying V Covid Contact Tracing Protocols

As Per the CDC:

- State and local public health officials will decide how to implement these activities and how to advise specific people, or groups of people, to be tested.
- Remote communications for the purposes of case investigation and contact tracing should be prioritized; in-person communication may be considered only after remote options have been exhausted.
- Testing is recommended for all close contacts of confirmed or probable COVID-19 patients.
- Those contacts who test positive (symptomatic or asymptomatic) should be managed as a confirmed COVID-19 case.
- If testing is not available, symptomatic close contacts should self-isolate and be managed as a probable COVID-19 case.
- Asymptomatic close contacts who are not tested should self-quarantine and be monitored for 14 days after their last exposure, with linkage to clinical care for those who develop symptoms.
- The best way to protect yourself and others is to stay home for 14 days if you think you've been exposed to someone who has COVID-19. Check your local health department's website for information about options in your area to possibly shorten this quarantine period.

Flying V's Contact Tracing Plan works on a 21 Day Timeline.

Contact Collection

Day 1:

Collection of direct contact for ticket purchasers and parties associated (ie ticket holder). This can be done at POS or at the door, but it's imperative that every non-staff member who enters through the front door is listed for Contact Collection.

Day 7:

Flying V will reach out, both via email to ensure that none of our audience has begun exhibiting symptoms or come away with a positive test.

In the case of a positive test: members of the Covid-positive audience on the event date will be directly emailed and suggest that they get tested. Flying V will do our best to direct audience member's to local free/low-cost testing resources.

Day 14:

A second reaching out via email for all members of the audience to see if there have been any other positive cases, providing the same resources.

Day 21: Final Contact

Another round of emails goes out to the participants thanking them for being an active part of our contact collection process. Additionally, direct contact to any positive cases, ensuring their health and wellbeing.

Please see the Contact Tracing Outline from the CDC below.
